7

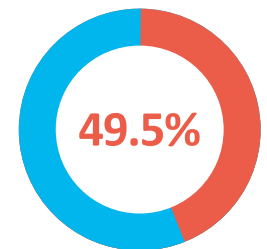

PERCENTAGE OF ORGANS EXCHANGED CROSS BORDER IN 2024

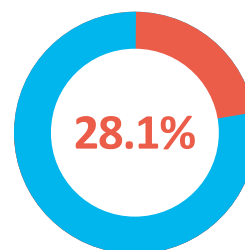

SPECIAL PATIENT GROUPS

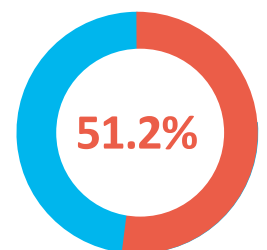

High urgency recipient

Pediatric recipient

Immunized kidney recipient

000 HLA mismatch kidney recipient

Current statistics can be found on <https://statistics.eurotransplant.org/>

MISSION

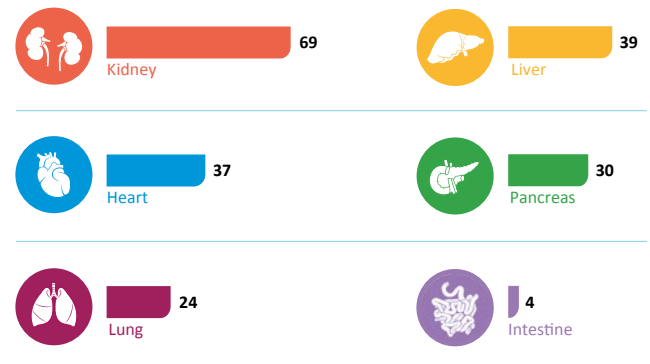

Eurotransplant is a non-profit international organization, situated in Leiden, the Netherlands, that facilitates allocation and cross-border exchange of deceased donor organs at the service of its eight member states. We support our community to fulfill our mission:

Organ transplantation offers life-saving and quality-of-life enhancing treatment options to patients with end-stage organ failure. Aiming to fulfill this potential, Eurotransplant was established and acts as mediator between donor hospitals and transplant centers, for the benefit of such patients.

COUNTRIES AND NUMBER OF ACTIVE TRANSPLANT CENTERS IN 2024

NUMBER OF TRANSPLANT PROGRAMS IN 2024

SERVICES ACCORDING TO THE BASIC MANDATE

We distinguish the following services to the member states:

Allocation services

- 24/7 duty desk organ allocation services.
- 24/7 immunological support to the allocation office and transplant centers by ETRL.
- Online waiting list data-entry.
- Online donor data-entry services.
- Evaluation of post-transplant results by maintaining a follow-up registry.

Development of allocation process

- Eurotransplant Advisory Committees (ACs): kidney, liver/intestine, pancreas, heart/lung, organ process chain, tissue typing, ethics and registry.
- Recommendations are developed by ACs in cooperation with the different national scientific transplant organizations and national authorities → Approval by Board of Management → Forwarding to national transplant authorities for check and approval → Implementation by ET office.
- Participation in European projects related to organ transplantation.
- Participation in national and international regulatory projects.

ORGANIZATION

Eurotransplant is fully connected with the members of its community. The organizational structure is democratic, with a Supervisory Board, Board of Management, Assembly, two advisory Councils and eight Advisory Committees.

With this structure, the national authorities, the national transplant societies and the Eurotransplant transplant programs have input in the policy and practice of Eurotransplant.

General Assembly	181 delegates of transplant programs within Eurotransplant
Number of Advisory Committees	8 (kidney, liver/intestine, pancreas, heart/lung, organ process chain, tissue typing, ethics and registry)
Number of employees	116
Annual budget	13 million euros

External networking

- Stimulating cooperation by organizing the annual meeting.
- Information on recommendations and current developments in organ allocation to stakeholders through news updates.
- Cooperation with international organ exchange organizations.

Reporting and accounting

- Annual Report.
- Close cooperation with national authorities.
- Standard donor, organ, and quality forms issued through our member site.
- Lectures by our staff members at congresses and meetings.
- Approval of our financial accounts by an external auditor.

SUPPORT

We organize supportive processes:

- Clearing house function concerning settlement of costs between donating and receiving transplant centers.
- Development and maintenance of information systems.

FINANCE

Our activities are financed by the health insurance companies in the participating countries. The organization's budget and the resulting registration fees are negotiated annually with the financiers and/or the national authorities.
